

Colton SKS Track and Accessories

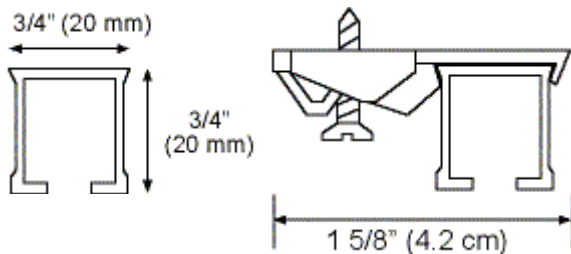

Colton SKS Cubicle Tracks white

With baked on painted surfaces and a slim profile, our cubicle tracks blend nicely with your ceilings and offer a smooth glide with its ball-bearing carriers. Our tracks can be pre-bent into a variety of configurations to fit difficult to cover areas.

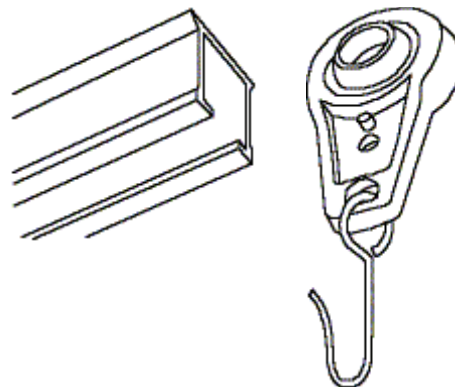

Tracks can be ceiling mounted or wall mounted easily with unique "click-in" brackets that give solid support. Our tracks are made from a tough extruded aluminum that allow for a durable track with a low profile, only 3/4" in height. Tracks come in lengths up to 20' long allowing for a splice free track in many situations.

Track cross section with #SKS-3003-25 Ceiling Bracket smart click

Standard #SKS-52107 ball bearing carrier with stainless steel hook
